EDUCATION

Patkar Varde College

Bachelor of Computer Applications (BCA)

Mumbai, India

2018 – 2021

EXPERIENCE

Frontend Engineer

Jan 2024 – Present

Altrata

Remote

- Built 5 core product modules in React.js and TypeScript, including heavy dashboard, implementing global state management, WCAG compliant accessibility, and unit testing.
- Established performance observability using Datadog and Lighthouse across 3 geographic regions, tracking Core Web Vitals to prevent regressions and maintain a consistent user experience.
- Led the migration of 6 standalone product frontends into a unified monorepo, standardizing the shared component library and routing layer to reduce maintenance overhead.
- Engineered an internal library of AI agent skills, comprising Product Owner, Code Executor, and QA Tester agents, using custom instructions and MCP integrations to automate ticket writing, Figma to code generation, and E2E tests.
- Integrated SonarQube into the PR workflow, generating automated security reports and remediation guidance as inline comments to resolve vulnerabilities before merge.
- Containerized test dependencies using Docker to run Playwright and BrowserStack E2E suites in GitHub Actions, cutting execution times by 80% and eliminating flaky test failures on all PRs.

SDE II

Aug 2021 – Dec 2023

Cogoport

Mumbai, India

- Built an internal React component library from scratch with 37 reusable components and a custom icon system, establishing a unified design language adopted by all product teams.
- Developed a React and Node.js based learning management system having in-house code compiler for structured onboarding of new engineers, adopted by over 120 engineers company-wide.
- Led 10 frontend engineers across Performance and SEO sub-teams, owning the technical roadmap, resource allocation, and code reviews for both.
- Migrated the build toolchain from Webpack to SWC across the codebase, reducing build times from 4 minutes to under 10 seconds and accelerating developer feedback loops.
- Increased daily organic traffic from 2,000 to over 6,500 users, implementing technical SEO optimizations and Core Web Vitals fixes to rank multiple pages in Google's top 5.
- Integrated a subscription billing system and 4 payment gateways, including Stripe, Chargebee, BillDesk, Razorpay implementing webhook handling to automate financial transactions and billing workflows.
- Designed a multilingual CMS with real-time REST API endpoints and update support for 36 languages, allowing non-technical teams to deploy content independently and eliminating engineering tickets.

PROJECTS

CDE | *React.js, WebContainers* | 2023

github.com/prashantpaddune/CDE

- Developed a browser-native IDE using WebContainers to run Node.js, execute terminal commands, and write to a live filesystem entirely on the client-side.

Drive2Park | *React.js, Node.js, Express.js, MongoDB, PWA* | 2021

github.com/prashantpaddune/Drive2park

- Developed a real-time parking PWA using React.js, Node.js, Express.js, and MongoDB to query live occupancy data and render responsive mobile interfaces.

TECHNICAL SKILLS

Front-End: React, Next.js, TypeScript, JavaScript, HTML5/CSS3, Tailwind CSS, shadcn/ui, TanStack Query,

TanStack Table, TanStack Virtual, Redux, Zustand, React Flow, Echarts, Recharts, React Native

Testing: Playwright, Cypress, Jest, Vitest, React Testing Library, Storybook, Chromatic, BrowserStack

DevOps: CI/CD, GitHub Actions, Docker, Kubernetes (K8s), AWS, Vercel, Datadog, Sentry, Lighthouse, SonarQube

Back-End: Node.js, Express.js, Python, Fastify, GraphQL, REST APIs, PostgreSQL, MongoDB, Prisma, Zod

AI/Agentic: Model Context Protocol, LangChain, LangGraph Neo4j, Vector Search

Tools: Figma, JIRA, Confluence, Git, Cursor, Claude Code, Claude Cowork, GitHub Copilot, Antigravity
